

Lesson 4

Taking a closer look

Today we will look at the photos of each student and consider the rules of photography the student tried to use. To critique each photo, ask:

1. Has the original photo been improved? How?
2. Which of the two new photos is better? Why?
3. Describe the ways in which the photo could be improved.
4. Help the photographer pick one of the photos to go back and reshoot, keeping in mind the improvements suggested in the discussion.

Activity: Take three

Before the next class period, reshoot one of the photos as determined by the teacher and class, keeping in mind the improvements suggested in the discussion. Experiment while taking the photos. Bring back the original, the best of the second set and your best one.
